You're live

%%firstname%%, your broadband is now live

Your new %%package_type%% is all set up and ready to go. You've got totally unlimited broadband and a powerful router to help you do more of the things you love online.

These handy hints can help you get the best possible broadband connection

%%router_type%% set up

Over the next 14 days we'll be testing and your line to help you get the best speed, so make sure to keep your router switched on. [Find out more here.](#)

Location, location, location

To make sure your signal is always as strong as it can be in your home, you should position your router upright and as high as possible, like putting it on a table or shelf – never on the floor. [Find out more here.](#)

Clean it up to speed it up

The devices you use can make a big difference to your speed, so make sure all your software and apps are up to date and running smoothly. [Find out more here.](#)

What's included in your package

- 100% totally unlimited broadband
- Award winning security and privacy features to protect you and your family from viruses and inappropriate content
- Plus you can rent the latest movies from your TV Box, online access to the TV Store or through the TalkTalk TV app

*You'll receive your Wi-Fi Extender Kit within seven working days and this charge will be automatically added

TalkTalk
For Everyone

Make your
Wi-Fi fly

Hello,

The super-cool loft extension, the man-cave at the bottom of the garden... how come some of our favourite hang-outs are often the hardest places to get a really good Wi-Fi signal?

The truth is, there's lots that can affect your Wi-Fi. Everything from the size and shape of your home to interference from other electricals can weaken it. So the further you are from your router, the harder it is to get a good signal.

Every home's different too, so even the best router in the world can't serve every one perfectly. Luckily, we've got something to help – one of our Wi-Fi Extender Kits. It teams up with your router, using your home's electrical wiring to carry your Wi-Fi signal even further. That means you can enjoy Wi-Fi in more of your home.

Wi-Fi in more places

We want you to get the best possible Wi-Fi connection, so as a TalkTalk customer your Wi-Fi Extender Kit is just £55.

[Buy now](#)

Tackle those Wi-Fi weak spots

- Wi-Fi Extender Kits plug into your electrical sockets and use your home's wiring to extend your signal
- Anywhere you've got a socket, you can get Wi-Fi
- They can give each of your devices quicker Wi-Fi
- Plug in and you're off

More ways to boost your Wi-Fi

Lots of things can affect your Wi-Fi signal, including where your router is positioned and how it's set up. Try these tips to give your Wi-Fi maximum oomph:

- ✓ Stand your router up
- ✓ Face it towards where you want to use Wi-Fi
- ✓ Place it as high as you can
- ✓ Keep it clear of obstacles and electricals

Because value matters
